

Whenever the ANTO logo is to be integrated in a partner's brand presence, use the bolder logo. Pay particular attention to the minimum distance of X (which always corresponds to the height of the initial letter of "Austria").

The size of this illustration is the absolute minimum. The more free space is allowed for the logo, the better.

The logo must under no circumstances be smaller than the minimum size of 6.5 mm in height. The width varies on account of different language variants.

Mindestgröße = 6,5 mm

## ATTENTION!

Where partners are integrated in ANTO communications, i.e. using a partner section placed in a slightly transparent box, the thinner logo variant should still be used in print media.

Minimum size = 6.5 mm
